

## Sirius PC

33 x 14 x 37 cm

*A side-panel vent allows direct air guide cooling for high performance processors.*

### More Headroom – Less Deskroom

The Sirius PC, in a compact microATX form factor, provides power to grow with your computing needs, in a space-saving design that doesn't take over your working space.

Available in silver/black mini-tower, all black mini-tower, and all black desktop/console. Black floppy drive and optical drive bezels (where possible) further enhance appearance.

The Sirius has 2 front USB connectors, one 5.25" drive bay behind a fold out door, one floppy drive bay, and one internal 3.5" hard drive bay. The microATX motherboard typically provides 3 PCI slots, onboard graphics and sound and optional on-board LAN. Some models provide an AGP slot for specialised graphics.

*Left:*  
All black console  
(replacement drive bay door with horizontal logo)

*Right:*  
**Close up of front panel:**  
Open drive bay door.  
Black FDD and CD drive.  
Power and Hard Drive LEDs.
